---

## Position Objective

To supervise the construction of future council assets (earthworks, roads, drainage, and other infrastructure works) associated with development sites and capital works program delivery to ensure works are constructed in accordance with approved plans, relevant Council standards, Infrastructure Design Manual (IDM) standards and other industry specifications.

## Key Responsibility Areas

The following are the key responsibility areas for the position:

- Undertake daily inspections of development works to ensure that contractors use appropriate industry practices.
- Monitor, record and assess construction activities including proof rolls, drainage installation, asphaltting depths, compaction rates etc, to ensure compliance with Council's specifications and standards.
- Reject works not complying with Council's specifications and standards.
- Maintain a record of construction including hold points released/approval to proceed.
- Resolve construction issues with consultants and contractors.
- Recommend variations to the works.
- Undertake Practical Completion (PC) and Final Completion (FC) inspections and record results. Separate PC and FC to be issued for identified DCP works.
- Maintain records relating to development works in line with IDM checklist.
- Assist to develop and review the construction specification and standard drawings.
- Ensure that abutting properties are given due consideration by the developer during construction activities.
- Maintain high-level technical knowledge industry best practice in engineering construction methods and techniques.

- To inspect and supervise construction of future council assets upon request of the Infrastructure Delivery project managers.
- To contribute to the success of Council through active teamwork and effective performance of the responsibilities of the duties of the position.

All other duties and additional tasks as directed, within the skills and abilities of a position at this level.
