SCOPE OF POSITION

Position Summary

The Manager Projects - Water Business Unit plays a pivotal role in delivering the Water Business Unit's Capital Works Program and Business projects.

The Manager Projects – Water Business Unit is responsible to the Executive Manager – Water Business Unit for the efficient and effective management of the Projects Branch, in particular:

- Project delivery, preferably for water supply and sewerage infrastructure.
- Development of engineering designs, specifications, tender documentation, procurement, contract management and contract administration and management and supervision of contractors.
- Strategic project management frameworks and within capital investment governance and approvals processes.
- Effective project delivery using a program approach and benefits realisation by ensuring project acceptance testing meets operational, compliance and customer handover requirements.
- Ensure all “as-constructed” data, including operation and maintenance manuals and requirements is captured in the corporate GIS and AMIS systems.
- Capital works budget development and management.

The Branch is responsible for business and infrastructure projects from project development phase through full financial approval to the finalisation of project delivery phase.

Position Description

Expected Deliverables / Key Performance Indicators

Leadership

- Proven ability to effectively lead a team of people, promote the Water Business Unit and projects function while fostering a positive, dynamic organisational culture which is committed to Council's vision and values.
- Manage the performance of staff members and contractors to ensure a strong customer service focus is maintained with prompt response to customer requests or complaints.

Strategy

- Development of strategies to achieve the Water Business Unit vision, goals and key priorities, in particular robust governance and a project management framework which focusses on delivery of committed customer service levels and outcomes.
- Build effective relationships and partnerships across key stakeholder groups including regional and industry bodies to ensure whole of asset life cycle costs can reduce the cost to serve our customers.

Innovation

- Foster a climate for continuous improvement for policies and processes and identify new fit-for-purpose emerging technologies or practices that can reduce the whole of asset life cycle cost.

Performance

- Deliver infrastructure which is accessible, operable, maintainable, reliable and safe to ensure service to our customers, regulators and the community is achieved.
- Implementing program and project management plans and reporting to ensure projects are delivered within risk appetite, scope, time and budget.
- Achievement of annually agreed capital and business project KPIs.
- Deliver on all corporate requirements for information management, workplace health and safety, financial and resource management, corporate and operational planning, quality and environmental management, governance and ethical conduct.
